

ROALDSTEIN - 1,8 km round trip

Easy hike with a fabulous view over Lake Snåsavatnet. The path is clearly visible through the woods.

Roaldstein is an old rural fortress and is primarily a work of nature. It's a 200 m high mountain knoll, with a sheer wall towards Lake Snåsavatnet on the south side. Several old hunting pits are visible from the path.

Perfect to combine the hike with a biketrip from Snåsa or as a detour off E6. Parking is not the best. Geocache at the hiking destination.
